

Top model: layered freemium athlete subscription → coach-sponsored expansion

Ireland-first · 2026

Key Partners

- Apple Health / HealthKit, WHOOP; later Garmin and Oura programmes
- Cloud, workflow, model and payment providers
- Irish strength coaches, CrossFit boxes, powerlifting clubs and gyms
- Data-protection/legal advisers
- Sports-science and academic validation partners
- Enterprise Ireland / TechIreland ecosystem

Key Activities

- Maintain canonical block/session/set ledger
- Run consent, completeness and policy gates
- Generate and validate evidence-backed proposals
- Preserve approval/outcome audit history
- Golden-scenario, RLS and prohibited-claim testing
- Onboarding, retention and pricing experiments
- Connector and partner operations

Key Resources

- Canonical training and decision schema
- Evidence-card UX and ghost sets
- Policy / prohibited-claims registry
- Consent and provenance layer
- Longitudinal decision-outcome dataset
- Founder domain expertise and brand trust
- Design-partner / coach network

Value Propositions

One explainable pre-session decision that joins the active block goal, prior sets/load/RPE and personal recovery trends.

- Evidence, confidence, gaps and counterfactual—not an opaque readiness score
- Ghost sets and prepared sessions reduce logging and decision friction
- Human approval preserves athlete/coach authority
- Consent-scoped inputs, source labels and audit trail build trust
- Outcome memory compounds into a unique evaluation asset

Boundary: decision support only; no diagnosis, injury prediction or guaranteed performance.

Customer Relationships

- Self-serve onboarding with seeded examples
- 21-day reverse trial after first usable snapshot
- In-product trust and evidence education
- Cohort-based beta community
- Coach-supported linked accounts
- Responsive data-rights and safety support
- No dark patterns; records survive downgrade

Channels

- Founder-led Irish design-partner cohort
- Powerlifting clubs and CrossFit boxes
- Wearable and lifting communities
- Coach referral / sponsored-athlete loops
- Web and app stores
- Evidence-card content and demos
- Later gym sales and partner integrations

Customer Segments

Primary

Serious self-coached recreational lifters following structured 8-12 week strength or hypertrophy blocks and already using a wearable or detailed log.

Secondary

Independent strength coaches managing roughly 5-20 athletes.

Later

Powerlifting/CrossFit clubs, premium gyms, workout platforms and wearable providers.

Not first

General wellness users, medical populations
or buyers seeking autonomous prescriptions.

Cost Structure

- Product engineering, UX and QA/security
- Model inference, database/storage and workflow
- Monitoring, backups, support and moderation
- Payment/app-store fees and refunds
- Connector development and partner programmes
- Legal, DPIA and data-protection operations
- Customer acquisition, pilots and validation research

Cost discipline: manual/CSV first; no integration before retained demand.

Revenue Streams

Launch: Free; Athlete €8.99/month or €79/year; Athlete Plus €12.99/month or €119/year.

Phase 2: Coach Pilot €29/month or €290/year for up to 10 active athletes; test €3/additional athlete.

Expansion: annual gym cohort licences; paid validation pilots credited toward contracts; later API platform + usage fees.

Excluded: advertising, per-decision charging, lifetime plans and sale of identifiable health/training data.

North-star: weekly retained athletes who create a context-ready snapshot, review a proposal and record an outcome.

Commercial gate: test €79 vs €99 only after activation; expand to coaches after recurring athlete use.

Basis: all supplied documents plus current official pricing benchmarks; prices remain hypotheses until paid cohort evidence.
